

# **Major Project Ideas**

1. Advanced QR Print Device and Deployment
2. Health Guardian: Detecting Pneumonia and Breast Cancer
3. Image Based Steganography web application
4. Smart Crop Recommendation App
5. Research on Parkinson's FOG Prediction
6. AI Powered People Detection & Recording Web App
7. Tactical Strategy Planning Bot v.2
8. Chatbot of custom data using LLM
9. Study Notion (an ed-tech platform)
10. Tomato Leaf Disease Detection Using Deep Learning
11. Data Visualization on heart disease using ML
12. Reactive Native Copilot
13. Fake Product Detection Using Blockchain
14. Asset Management
15. SMS Spam filtering
16. Analysis - Halal Certification on Products and Organizations
17. Vehicle Parking Management System
18. Hand Sign Recognition System for Hearing Impaired Community
19. Ticket Master using blockchain
20. Multiple Disease Prediction
21. Driver Drowsiness Detection System

22. Transaction Management System
23. Task Manager
24. Agro Tech: A comprehensive crop disease diagnosis
25. Online Examination System
26. Proxima: AI-Powered Virtual Assistant
27. Sorting Visualizer
28. Video Transcript Summarizer
29. Arduino human following robot
30. Comparative Analysis of Machine learning Algorithms for Student placement Prediction
31. Presentation control using hand gestures
32. Implementing knowledge graphs
